

Envirotainer station network as per September 2020

EXTERNAL USE

We provide a large selection of lease packages and services for our different containers. In short, they are:

- A 5-day and 9-day lease package for Network trips for all four (4) container types.
- An 11-day, a 21-day and a 30-day package for Round Trip and Round Trip Flex with E-tech.

The network rules tell which containers can be released and returned at what station. The Route Finder, available at www.envirotainer.com/services/route-finder, is always updated with the latest information. When booked via the online booking system, the system will provide all the possible options.

Our Lease Types

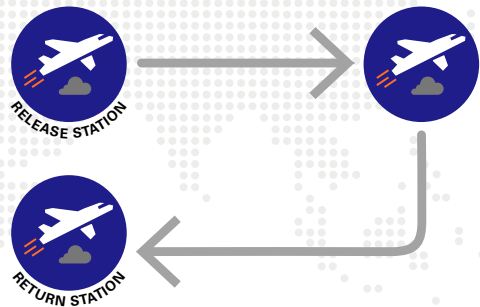

Network Lease

Allows for a container to be picked up at an Envirotainer Station and returned to another Envirotainer Station.

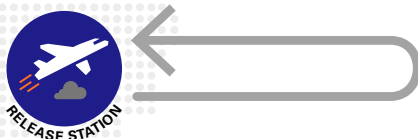

Round Trip Flex Lease

A Round Trip Flex Lease allows a container to be returned to an Envirotainer Station, within the same trucking cluster that it was released from, but different than the release station.

Round Trip Lease

A Round Trip Lease requires that a container is returned to the same Envirotainer Station that it was released from.
